Selected work, supporting material, and a representative reconstruction.

— EXPERIENCE

Research Automation Consultant

MAY TO AUGUST 2026

Asset management firm · Newport Beach, CA

- Returned as a consultant after the 2025 investment research internship. Built four workflows in twelve weeks that draft quarter-end commentary, generate short reports, start fundamental review paragraphs, and brief the top ten holdings.
- Turned roughly 100 published short-seller reports into reusable forensic methods that test counterevidence and deliver sourced findings and open questions.
- Kept sources with every output and folded analyst corrections into later builds; built with SQL, Python (pandas), and Claude skills.

Investment Research Analyst Intern

JULY TO AUGUST 2025

Strategic Global Advisors · Newport Beach, CA

- Built and presented an equity pitch on Mercedes-Benz using bottom-up fundamentals and macroeconomic context; senior analysts continued the due-diligence process.
- Prototyped a risk-scoring mechanism assigning probability-weighted risk to price targets as an additional check on DCF and DDM outputs.
- Worked with the Quant Team on AI-enhanced equity screening; contributed to RFP preparation and ETF analysis on Bloomberg and FactSet.

IT Intern, Digital Workspace Endpoint Team

JUNE TO AUGUST 2024

Fisher Investments · Camas, WA

- Taught myself Citrix Server 2019 architecture to map and document a company-wide endpoint migration; identified and corrected gaps in the documentation the implementation team depended on.
- Found process changes that moved the migration timeline forward by 30 days; managed service requests and external contractors in ServiceNow and Jira.
- Placed first in the firm's Summer 2024 Stock Market Challenge, finishing with a simulated portfolio value of \$1,118,961.87.

— EDUCATION

University of Oregon

SEPTEMBER 2021 TO JUNE 2025
